HAIDER ALI

Full Stack Developer · AI & SaaS

Lahore, Pakistan · haiderali.ravian@gmail.com · +92 317 7365496
haiderali.dev/work · linkedin.com/in/haiderali-ravian · github.com/haiderali-ravian

Full Stack Developer with nearly 4 years of experience building production SaaS applications using React, Next.js, TypeScript, Node.js, NestJS, PostgreSQL, and MongoDB. Specialized in end-to-end product delivery, subscription systems, OAuth and webhook integrations, and AI-enabled workflows for businesses in Australia and the UAE.

WORK EXPERIENCE

Sparkix Technologies Sep 2025 – Present
Full Stack Developer · Remote

- Built full-stack workflows for **Grace AI**, a production AI receptionist SaaS for Australian trade businesses, using Next.js, NestJS, PostgreSQL, and Stripe across onboarding, bookings, customer management, subscriptions, and voice-agent operations.
- Developed **Oper8**'s onboarding, configuration dashboards, unified calls and emails inbox, website knowledge ingestion, and Gmail/Outlook automations, centralizing communication workflows for UAE businesses.
- Integrated ServiceM8 through OAuth 2.0 and bidirectional webhooks, adding signature validation, idempotency, retries, and logging to keep job and customer data synchronized reliably.
- Delivered multi-role product features and backend APIs for **Astromegistus** and Care Compass, covering payments, scheduling, health records, and role-based customer and provider workflows.

RankOrbit Aug 2024 – Sep 2025
Full Stack Developer · Lahore, Pakistan

- Built **Rockstar Color Visualizer** with Next.js, FastAPI, and Meta SAM, enabling users to preview paint colors on uploaded house images.
- Developed **TeleDental** workflows connecting patients and dentists through concern posts, media uploads, messaging, appointment scheduling, and virtual consultations.
- Developed a Next.js and MongoDB internal CRM with real-time chat, a custom calendar, IP-based access restrictions, and role-based access control for secure team operations.
- Co-developed a multi-tenant service-business SaaS using Next.js, NestJS, PostgreSQL, and Stripe, supporting subscriptions, bookings, email automation, and tenant-level access control.
- Contributed to **Ryvals**, a live gaming tournament platform, building frontend modules and tournament-management workflows.

HazelSoft Mar 2024 – Jul 2024
Full Stack Developer · Lahore, Pakistan

- Built booking and invoicing applications with React, Next.js, Node.js, and MongoDB, replacing manual inquiry and paperwork workflows for service businesses.

GCU Lahore Apr 2023 – Mar 2024
Full Stack Developer (Hybrid) · Lahore, Pakistan

- Architected a React, Node.js, and MongoDB CMS with JWT authentication and digital signatures, digitizing approximately 90% of previously manual university processes.
- Built Next.js departmental websites and content-management modules, enabling staff to publish updates while maintaining consistent branding across faculties.

Maxsol Jan 2023 – Mar 2023
Frontend Developer · Remote

- Converted Figma designs into responsive React applications and built an HVAC dashboard with Chart.js, appointment booking, and business metrics.
